

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Please cancel claims 3, 8-13 and 17-24.

Listing of Claims:

1 (Currently Amended). A golf club head comprising:

a face component having a mass ranging from 25 grams to 100 grams, the face component comprising a striking plate portion and a return portion composed of a ~~magnesium alloy material~~ a low-density material, the face component also comprising a second layer disposed on an interior surface of the striking plate portion, the second layer composed of a ~~titanium alloy material having a density greater than the density of the low-density material~~, wherein the striking plate portion and the return portion of the face component have a thickness ranging from 0.030 inch to 0.060 inch, and the second layer of the face component has a thickness ranging from 0.030 inch to 0.060 inch; and

an aft-body connected to the face component, the aft-body having a mass ranging from 10 grams to 60 grams;

wherein the golf club head has a mass ranging from 165 grams to 225 grams and a volume ranging from 290 cubic centimeters to 600 cubic centimeters.

2 (Original). The golf club head according to claim 1 further comprising a weight member having a mass ranging from 30 grams to 120 grams.

3 (Canceled).

4 (Original). The golf club head according to claim 1 wherein the aft-body is composed of a plurality of plies of pre-preg material.

5 (Original). The golf club head according to claim 1 wherein the aft-body has a mass ranging from 15 grams to 50 grams.

6 (Original). The golf club head according to claim 2 wherein the weight member has a mass ranging from 50 grams to 80 grams.

7 (Original). The golf club head according to claim 1 wherein the golf club head has a volume ranging from 385 cubic centimeters to 475 cubic centimeters.

8-13 (Canceled).

14 (Currently Amended). A golf club head comprising:

a face component having a mass ranging from 25 grams to 100 grams, the face component comprising a striking plate portion and a return portion composed of ~~an~~ aluminum-a magnesium alloy material, the face component also comprising a second layer disposed on an interior surface of the striking plate portion, the second layer composed of a steel alloy material, wherein the striking plate portion and the return portion of the face component have a thickness ranging from 0.030 inch to 0.060 inch, and the second layer of the face component has a thickness ranging from 0.030 inch to 0.060 inch ~~having a density greater than the density of the low-density material;~~

an aft-body connected to the face component, the aft-body having a mass ranging from 10 grams to 60 grams, the aft-body composed of a non-metal material;

at least one weight member attached to the aft-body, the at least one weight member having a mass ranging from 30 grams to 120 grams.

wherein the golf club head has a mass ranging from 165 grams to 225 grams and a volume ranging from 290 cubic centimeters to 600 cubic centimeters.

15 (Original). The golf club head according to claim 14 wherein the golf club head has a volume ranging from 385 cubic centimeters to 475 cubic centimeters.

16 (Original). The golf club head according to claim 14 wherein the moment of inertia about the Izz axis of the golf club head is greater than 3000 grams-centimeter squared.

17-24 (Canceled).
